PROFESSIONAL SUMMARY

Economics student at the University of Toronto with strong applied experience in financial modeling, data analytics, and investment analysis. Demonstrated ability to build portfolio optimization models, perform risk-return analysis, and apply quantitative tools including Python, Excel, and Power BI. Completed multiple investment banking, wealth management, and data analytics virtual experiences with leading financial institutions. Interested in roles in capital markets, wealth management, risk analysis, and financial advisory.

WORK EXPERIENCE

CF&R Services — Warehouse Associate Apr 2025 - Aug 2025

- Executed high-volume inventory management, shipping, and receiving operations in a fast-paced logistics environment
- Maintained accuracy, operational efficiency, and compliance with performance standards

University of Toronto — DataFest Volunteer May 2026

- Supported registration, participant coordination, and operational logistics for a large-scale data analytics competition
- Collaborated with organizers to ensure smooth execution of event workflows

City of Pickering — Assistant Camp Counselor Jul - Aug 2023

- Supervised youth participants and facilitated structured recreational programs in a team-based environment
- Strengthened leadership, communication, and organizational skills under time-sensitive conditions

VIRTUAL EXPERIENCE PROGRAMS (FORAGE)

Bank of America: Sales and Trading Analyst May 17, 2026

- Focused on analyzing market trends and delivering client-centric solutions within the sales and trading division
- Researched and proposed strategic recommendations for optimizing trade execution processes and enhancing workflow efficiency using automation and process analysis.

Citi's Wealth May 19, 2026

- Developed an investment strategy using asset allocation and tax-efficient investing aligned with moderate risk goals.
- Strengthened client communication by presenting investment recommendations and explaining financial concepts clearly in a simulated advisory setting.

Fidelity International's Investment Management May 20, 2026

- Applied analytical skills to optimize a managed investment portfolio and provide actionable suggestions for improvement.
- Evaluated publicly listed stocks and fixed income opportunities through SWOT and relative valuation analysis and effectively communicated findings
