PROFESSIONAL SUMMARY

Recent B.S. in Information Systems graduate with experience in business analysis, operational optimization, and data-driven problem solving. Skilled in systems analysis, ERP workflows, process improvement, and technical troubleshooting across retail and business environments. Proficient in SQL, Power BI, Tableau, JavaFX, Linux, and Microsoft Office Suite with a strong foundation in operations and analytical decision-making.

EDUCATION

The University of Texas at Arlington Bachelor of Science | Information Systems August 2022 – May 2026

EXPERIENCE

Mount Travel and Tours – *Business Systems Analyst Intern | Travel Services Company;* Dallas, TX June 2024 – April 2026

- Analyzed ERP workflows, reservation systems, and operational data to improve optimization, reporting accuracy, and process performance
- Identified system inefficiencies, data discrepancies, and workflow issues while supporting collaborative technical and operational solutions
- Conducted system testing, data validation, and business process analysis to support operational reliability and data-driven decision-making

Ulta Beauty – *Beauty Advisor | Retail Cosmetics Company;* Arlington, TX July 2025 – January 2026

- Analyzed customer purchasing patterns and provided product recommendations to support sales performance and customer engagement
- Supported merchandising analytics and stock replenishment processes to maintain product accuracy and operational efficiency
- Collaborated with management and team members to optimize store operations and enhance the overall customer experience

Daiso – *Sales Associate | Japanese Household Goods;* Frisco, TX May 2021 – April 2023

- Assisted customers with purchases, product selection, and checkout operations while maintaining efficient daily store performance
- Supported inventory restocking, merchandising, and store organization to ensure accurate product displays and availability
- Maintained a clean and organized sales floor while collaborating with team members to deliver strong customer service and operations

PROJECTS

McDonald's Corporate Strategy Analysis – *Consultant, Academic Case Project* February 2026 – April 2026

- Conducted quantitative analysis and Excel modeling to evaluate McDonald's growth, operational performance, and long-term efficiency
- Analyzed franchise strategies, financial tradeoffs, and operational efficiency to support data-driven recommendations and planning
- Presented data-driven findings and forecasting insights through business analysis, reporting methods, and strategic presentations

JavaFX Application Development – *Developer* October 2025 – November 2025

- Developed and tested a JavaFX inventory management application for a business project using object-oriented programming principles
- Performed debugging, troubleshooting, and system analysis to resolve technical issues and improve application functionality
- Implemented frontend and backend integration and event-driven logic to support application performance, usability, and user interaction

LEADERSHIP EXPERIENCE AND ACTIVITIES

Rooted South Asian InterVarsity – *Founder, Leader;* Arlington, TX March 2024 – May 2026

- Managed a $20K+ budget while overseeing procurement, resource allocation, and operational planning for large-scale organization events
- Led crossfunctional coordination, logistics planning, and inventory organization to support efficient event execution and team operations
- Prioritized multiple projects and identified operational challenges to improve workflow efficiency and resource management
