CAREER SUMMARY

Early-career software development and IT automation professional with hands-on experience developing PowerShell scripts, AI-powered workflows, and software applications. Skilled in automating operational processes, integrating cloud-based services, troubleshooting enterprise systems, and developing solutions using Java, JavaScript, and PowerShell. Experienced in endpoint security, data integration, and technical problem-solving, with a strong interest in full-stack engineering, DevSecOps, and AI-driven automation.

SKILLS

Programming/Scripting: PowerShell, Java, JavaScript, TypeScript, SQL, Python (developing proficiency)
Web Development: React, Next.js, Node.js, Express, HTML, CSS
Databases: MySQL, MongoDB, Firebase
Cloud & DevOps: Microsoft Azure, AWS, Git, GitHub, Azure Storage, Qualys
Security & IT Operations: Endpoint Security, Vulnerability Management
Software: Microsoft 365 (Word, Excel, Outlook, PowerPoint)
Development Practices: Debugging, Unit Testing, REST APIs, Technical Documentation

WORK EXPERIENCE

DELOITTE — *Remote*

IT Analyst Intern — *Jan. 2025 - July 2025*

- Streamlined internal compliance investigations through log-retrieval automation to collect files from multiple directories and locations in a single execution, saving an estimated 15–30 minutes per retrieval.
- Enhanced PowerShell-based Qualys health diagnostics to identify missing agent services, connectivity failures, and data synchronization issues, improving endpoint monitoring and reporting visibility.
    - **Key Result:** Developed 5 production scripts across varying endpoint configurations which reduced manual oversight and IT coordination efforts, elevating the team's knowledge base to empower adjacent IT teams.

STAPLES — *Cutler Bay, FL*

Sales Associate — *Feb. 2022 - May 2022*

- Provided technical assistance for printers, smartphones, and computers, helping customers troubleshoot product issues and identify appropriate solutions.

UNITEDHEALTH GROUP — *Remote*

Customer Service Representative — *Aug. 2020 - Oct 2021*

- Triaged complex customer issues involving provider coordination, coverage, benefits, and appointments, researching solutions and escalating cases to appropriate teams when additional expertise was required.

PROJECTS

MinusThis | Independent Automation Venture | HTML, CSS, JavaScript, React

Website

- Founded an independent automation initiative focused on identifying repetitive operational workflows and opportunities to improve efficiency for small businesses.

AI-Powered Job Search Automation | n8n, AI Agents, Google Sheets, Google Docs, Telegram

Documentation

- Developed an AI-powered job search workflow using n8n to identify relevant job opportunities and generate personalized recommendations based on a candidate's resume and qualifications.
- Integrated Google Sheets to organize job opportunities, analyze required skills, and record job-fit scores based on alignment with the candidate's existing skill set.
- Automated report generation in Google Docs to summarize recommended positions, skills requirements, and candidate-job alignment.
- Implemented Telegram notifications to alert users of relevant opportunities and provide direct application links, connecting job discovery, analysis, reporting, and delivery into an end-to-end workflow.

Interactive Audio Visualizer | React, TypeScript, p5.js, Firebase
GitHub

- Developed an interactive web application featuring audio playback controls and real-time visualization using React and p5.js.
- Integrated Firebase services and worked with browser audio APIs, troubleshooting application state, audio processing, and asynchronous resource loading.

Order Management API | Java, Spring Boot, MongoDB Atlas
GitHub

- Developed RESTful API functionality for managing customer orders using Spring Boot and MongoDB Atlas.
- Implemented order data models and database integration, troubleshooting application errors involving API responses, data mapping, and document persistence.

EDUCATION

UNIVERSITY OF SOUTH FLORIDA *Tampa, FL*
Bachelor's Degree - Information Technology *Expected July 2028*

MIAMI DADE COLLEGE *Miami, FL*
Associate's Degree – Computer Information Systems Aug. 2019 – July 2022

- GPA: 3.85/4.0 *(Graduated top 10%)*

YEARUP UNITED *Tampa, FL*
Bootcamp – Application Development *Aug. 2024 – July 2025*

- *A year-long software development program specializing in backend development (Java, Spring Boot, SQL, Git)*

BRAINSTATION *Miami, FL*
Bootcamp – Software Engineering *June 2023 – Sep. 2024*

- *A 12-week software engineering program revolving around modern web development (MySQL, Express.js, React, Node.js, Agile)*
