Education

THE ICT University Cameroon

Oct. 2023 – July 2026

Bachelor of Science in Computer Software Engineering

City, Yaounde

Relevant Coursework

- Data Structures
- Software Methodology
- Microservices
- Architecture
- Database Management
- Artificial Intelligence
- Project Management
- Programming
- Computer Architecture
- Cybersecurity

Experience

LIFE Cameroon

2023 – Present

IT Student & Project Contributor

Cameroon

- Studied diverse topics including IT Support, Networking, Operating Systems, System Administration, and Software Engineering.
- Completed hands-on Coursera projects as part of the Google IT Support Professional Certification.
- Continually improving technical skills through personal learning and structured training.

ICT University

2023 – Present

Peer Mentor & Student Leader

Yaounde, Cameroon

- Mentored 30+ students by providing personalized IT study plans and continuous academic follow-up.
- Actively participated in software engineering clubs to collaborate, build projects, and enhance problem-solving skills.
- Maintained excellent academic performance over 3 consecutive years.

Projects

LOOP Job-Seeking Platform | *React, Node.js, MonogoDB*

2024

- Contributed to building LOOP, a platform that directly connects job seekers with recruiters.
- Collaborated with teammates to improve features, UI flow, and platform functionality.
- Maintained clean code and used GitHub for version control and task assignments.

Cloud Simulation Platform | *Python, Flask/FastAPI, Socket Programming, Distributed Systems*

2025

- Developed a cloud simulation platform that mimics the behavior of distributed cloud nodes for storage, processing, and communication.
- Implemented node registration, heartbeat monitoring, data replication, and basic fault-tolerance mechanisms.
- Designed a controller service to manage node availability, distribute tasks, and handle request routing.

Smart Njangi Companion App | *React Native, Firebase*

2025

- Developed an app enabling Njangi groups to track contributions, view payout schedules, and manage savings/loans.
- Worked on features for online meetings, group coordination, and financial tracking.
- Integrated cloud database support for user activity and records.

Technical Skills

Languages: Python, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Eclipse, Google Cloud Platform,

Technologies/Frameworks: Linux, Jenkins, GitHub, React

Leadership / Extracurricular

NgCodex Coding Community

2023 – Present

Active Member & Contributor

Yaounde, Cameroon

- Shared ideas during training sessions and collaborated with administrators to support new learners.
- Participated in technical workshops focused on programming, software engineering, and IT problem solving.
- Contributed to group discussions and assisted peers in understanding project workflows and tools.

Women Techsters Bootcamp (Cohort 4.0)

2023 – 2024

Participant – Software Development Track

Virtual/Hybrid

- Completed structured training in software development under a supervised program.
- Collaborated with other women in tech to build projects and strengthen programming foundations.
- Engaged in coding challenges, teamwork activities, and mentorship sessions.
