PROFFESIONAL EXPERIENCE

Company: Log(N) Pacific 31/05/2026 - Present

Title: IT Security Support Analyst Intern

Vulnerability Management:

- Conducted vulnerability scans, provided detailed reports, and implemented PowerShell-based remediations, contributing to a 100% reduction in critical, 90% in high, and 76% in medium vulnerabilities for the server team.
- Performed vulnerability assessments and risk prioritization using Tenable across Windows and Linux environments.
- Executed secure configurations and compliance audits (DISA STIG) with Tenable to meet industry standards.
- Automated remediation processes and STIG implementations using PowerShell to address critical vulnerabilities.
- Deep understanding of the “soft” side of Vulnerability Management: rapport, trust, transparency, and business need.

Security Operations:

- Performed threat hunting with EDR, detecting IoCs from brute force attacks, data exfiltration, and ransomware.
- Designed, tested, and published advanced threat hunting scenarios for incident response tabletop exercises
- Developed custom detection rules in Microsoft Defender for Endpoint to automate isolation and investigation of compromised systems.
- Reduced brute force incidents by 100% by implementing inbound NSG/firewall rules to limit Internet exposure.
- Created Microsoft Sentinel dashboards to monitor logon failures and malicious traffic using threat intelligence.
- Experienced with KQL (similar to SQL/SPL) which I used to query logs within the SIEM and EDR platform.

Company: Extern (Hydroficient) 31/05/2026 - 20/07/2026

Title: Cybersecurity Defense Intern

- Analysed IoT device-to-dashboard communication workflows using MQTT messaging and sensor telemetry to identify potential cybersecurity risks and insecure communication paths
- Applied cybersecurity principles including authentication, network segmentation, encryption and monitoring while reviewing secure architecture concepts for connected devices, brokers and dashboards.
- Contributed to strengthening the organisation's security awareness by identifying potential vulnerabilities in simulated operational environments and supporting secure-by-design practices across project exercises.

CERTIFICATIONS

CompTIA Security+

CompTIA Network+

Microsoft Azure Fundamentals (AZ-900)
