EXPERIENCE

ARCeH (Advancing Research for Children's Health) | Extern

Aug 2026 – Nov 2026

Data Analytics Health Outcomes Extern

Remote

- Analyze publicly available children's environmental health datasets to develop focused research questions and produce defensible, evidence-based findings.
- Apply Python and statistical analysis methods to explore data, evaluate relationships, and stress-test findings against common analytical pitfalls and limitations.
- Translate quantitative results into practitioner-facing deliverables, including data visualizations, a written research brief, and a presentation for non-technical audiences.

Weekend Health

Jan 2024 – Feb 2025

Member Experience Manager

San Francisco, CA

- Managed high-volume patient communications and translated complex medical, pharmacy, and insurance information into clear, actionable guidance for clients receiving GLP-1 medication treatments.
- Collaborated with clinicians, pharmacies, and internal teams to maintain secure documentation, communication flow, and service consistency for clients in a health program.
- Responded to at least 120 client inquiries and operational tasks daily, while identifying workflow improvements to reduce delays in prescription processing.

Noom Inc.

Sep 2019 – Nov 2022

Health Coach

New York, NY

- Delivered structured health education and behavior-change coaching to groups of 50 - 100 clients, supporting engagement and health program adherence.
- Translated complex health and behavioral concepts into accessible written communication for diverse audiences in a digital weight management program.
- Identified onboarding and user-experience issues, documented recurring problems with company mobile application, and recommended process improvements to reduce client confusion and internal errors.
