Mateus Santana

Senior Software Engineer at Extern | React | Next.js | Typescript |
Node.js

São Paulo, São Paulo, Brasil

Resumo

Hi, I'm Mateus. I'm a software engineer with over ten years of experience. I've worked in several areas, from sports e-commerce, food tech, beauty e-commerce, and fintech. I enjoy working in agile teams. I'm great at working with very few instructions, asking questions, spelling stories, and finding loose ends, learning from those around me, and having fun while we build great features.

I'm based in Brazil (UTC-3 timezone).

Experiência

Extern

Senior Software Engineer

junho de 2023 - Present (2 anos 10 meses)

Nyla

Senior React Developer

janeiro de 2023 - abril de 2023 (4 meses)

- Responsible for refactoring a legacy critical logic on product details page

Stone

Senior Software Engineer

maio de 2021 - dezembro de 2022 (1 ano 8 meses)

São Paulo, Brazil

Stone is a company that services its customers through payment and management tools, flexible financial products with no bureaucracy, and close and efficient service, enabling them to be more autonomous and increasingly more independent.

- Responsible for designing and developing the legacy front-end architecture migration to a new approach based on DDD concepts.
- Responsible for creating a roadmap for migration to the new architecture.

- Responsible for tech talks to pass the knowledge about the new architecture.
- Responsible for creating an internal feature flag library.
- Responsible for leading a team with ten people, responsible for features such as Statement, Open Finance, Authentication, KYC(Know Your Customer), and Payments.
- I performed training for junior developers that joined the team, frequently doing pair and mob programming sessions.
- Responsible for creating a one-on-one process with monthly goals, what was good, some warning points, and feedback.
- Responsible for creating a developer tool to improve the team development experience.
- Responsible for leading an initiative called cavalry focused on looking for improvement in the design patterns, tests, performance, build process, and documentation.

Tech Stack: Javascript, Typescript, Node.js, React, Next.js, styled-components, Testing Library, Cypress.

Sallve

Senior Software Engineer

junho de 2020 - março de 2021 (10 meses)

São Paulo, Brazil

A Brazilian direct-to-consumer (DTC) beauty startup obsessed with the experience of the community.

- Responsible for maintaining the checkout application.
- Responsible for creating integrations and scripts to help Sallve on 2020 Black Friday. It was a week and month with the most significant revenue in history.
- Responsible for creating a custom Shopify app for Sallve's needs.
- Responsible for creating integrations with Shopify APIs using a serverless approach.

Tech Stack: Shopify Platform, Liquid template, HTML, SASS, JavaScript, jQuery, React, Node.js, Next.js, Typescript, GraphQL, Firestore, Google Cloud Functions, Vercel Serverless Functions.

Doris.mobi

Senior Software Engineer

dezembro de 2018 - março de 2020 (1 ano 4 meses)

São Paulo Area, Brazil

Doris is an evolution of fashion together with technology so that everyone can try the looks they want. Doris is here to make the shopping experience much easier, more immersive, and fun. All this without leaving home, at the speed of touch, on your cell phone.

- Responsible for starting from scratch a mobile app with React Native.
- Responsible for research and creating proofs of concept.
- Responsible for leading the decisions about design and code architecture.
- I performed training for junior developers that joined the team, frequently doing pair and mob programming sessions.

Tech Stack: JavaScript, TypeScript, React, React Native, Redux, GraphQL, Apollo client, Jest, Testing Library, Enzyme, Serverless Functions(AWS Lambda), Node.js.

iFood

Senior Software Engineer

janeiro de 2018 - novembro de 2018 (11 meses)

São Paulo Area, Brazil

iFood is a reference FoodTech in Latin America. Invested by JUST EAT. It operates mainly in Brazil and Mexico after merging its businesses in Argentina and Colombia with rival PedidosYa. With 60 MM monthly orders and more than 90% of Brazil's market share in delivery.

- Responsible for developing new features in back-office tools on the logistics team.
- Responsible for creating a workflow to approve drivers on the platform. This project was important to process to open a delivery app in Google Store. It was previously available only to beta users. When the driver's cloud system(like uber), where any person could be registered and after approbation was able to work.

Tech Stack: JavaScript, Flow, React, Redux, Redux-Saga, Jest, Enzyme, Cypress.

Grupo Netshoes

Software Engineer

agosto de 2017 - janeiro de 2018 (6 meses)

São Paulo Area, Brazil

As a front-end developer, I developed new features and helped maintain the proprietary e-commerce platform of Netshoes. This platform renders more than 25 partner sites using Dust.js and Express.js. It does not use front-end frameworks, only JavaScript with some design patterns such as IFFE(Immediately invoked function expression), Pub-Sub, Factory, Prototype, and Singleton. Also, Responsible for creating a gift experience in the buying process.

- Responsible for the development of new features for the Netshoes Group.
- Responsible for creating a gift experience in the buying process.
- Worked with an agile team focusing on improving the user experience.
- A big highlight in my career working with marketing was the opportunity to create a unique page for Netshoes. After the announcement draw that defined the 2018 FIFA World cup in each group game, we started working on a landing page to generate qualified leads and improve the Netshoes site's search engine ranks when customers searched about the world cup. I developed a static page with HTML, CSS, and JavaScript, ensuring SEO standards.

Tech Stack: Javascript, Node.js, Dust (template engine), HTML, SASS, Grunt, Gulp, Jasmine, Mocha.js, Chai.js.

Universo MW8

Software Engineer

fevereiro de 2016 - agosto de 2017 (1 ano 7 meses)

Salvador e Região, Brasil

About MW8:

MW8 is a multidisciplinary mix of great professionals focused on designing solutions that combine information technology and business communication for great companies like Samsung and Ambev.

I developed projects in Ruby and Rails, Node.js, Angular.js, and React.js

Projects:

GPA Project

Was a back office to manage the operation of a system that provided promotions based on consumer shopping. This back office had features such as CRUD of offers, reports, clients register, Role-Based access control, and more.

Tech Stack: Angular.js, Ruby and Rails, MySQL

PlayON

- Software for managing digital signage (Digital Signage). Featuring state-of-the-art content management features and support for numerous media formats.
- Backend: Provides APIs to BackOffice and Mobile Application.
- BackOffice: Provides features to manage clients' content, such as uploading videos to the gallery, creating playlists, scheduling playlists, and more.
- App: It was installed in Smart TVs or Android hardware, working online and offline. When online, the app in the background downloads content such as the day's schedule, plays videos by playlist order, and local management content.

Tech Stack: JavaScript, Node.js(Express), MongoDB, React, Redux, React Native, Mocha.js, Chai.js, Sinon.js, Firebase, React Native, TDD with Mocha - Chai - Sinon, Firebase

Inovatio Comunicação Digital

Web Developer

agosto de 2014 - fevereiro de 2016 (1 ano 7 meses)

Salvador- Brasil

About Inovatio:

Founded in 2010, Inovatio is an agency specialized in digital marketing, they work helping companies to occupy their place on the internet, with useful and modern websites. With national performance in Brazil, they develop websites for all segments: education, health, fitness, beauty, wellness, services, gastronomy, and autonomous professionals, among others.

Role description:

Inovatio It is a system to create websites similar to Wix. In this system, we developed ASP.NET and Razor. As a front end, my focus was on developing themes. I developed over 200 different themes for the system theme base.

Tech Stack: Javascript, jQuery, third-party libs, HTML, CSS, Bootstrap framework, C#, ASP.NET, Razor, PL/SQL.

ZCR Informática

Web Developer

maio de 2013 - julho de 2014 (1 ano 3 meses)

About - ZCR

For over 20 years in the market, ZCR Informática has been the most recommended I.T company in the North and Northeast of Brazil. I am working on creating and integrating products and services in projects in a wide range of segments.

Role description:

As a Web developer, I developed PHP, JAVA, and C# projects with .NET, focusing on the front-end. Designed interfaces for back-end developers to integrate into the MVC architecture.

Projects:

Internal Product

- A product for planning projects, with features like creating projects, tasks, planning actions, priorities, deadlines, and follow-up tasks, similar to a Jira.

Tech Stack: Javascript, jQuery, HTML, CSS, PHP, MySQL.

Internal CMS

- An internal product to auxiliary some websites that ZCR developed. With features such as pages, posts, categories, image galleries, users, and Role-based access control. The approach of this project is similar to WordPress.

Tech Stack: Javascript, jQuery, HTML, CSS, C#, ASP.NET, SQL Server.

Bahia Architectural Council Website

- Developed the new interface from the CREA-BA website. I restructured the home and page layout and implemented a complex Menu with three nested levels. I developed using the Internal CMS, HTML, CSS e JavaScript, and jQuery with third-party libraries and plugins such as a gallery, calendar, and modal.

Tech Stack: Javascript, jQuery, HTML, CSS, Internal CMS.

Bahia Government Project

- After winning a bid, We delivered a project that facilitated water delivery to families in the Brazilian backlands. I made some features in the back office,

such as the register of recipients, delivery validation of the water tank by the recipient signature, made in the android App used by agents.

Tech Stack: Javascript, jQuery, HTML, CSS, C#, ASP.NET, SQL Server.
