Computer Science student at Kennesaw State University with hands-on experience building team-based web and database applications. Skilled in Java, Python, SQL, C#, Git/GitHub, Linux, and AWS fundamentals, with strengths in object-oriented development, debugging, requirements analysis, and collaborative delivery. Seeking an entry-level software development role where I can contribute my programming, problem-solving, and collaborative development skills while continuing to grow as a software engineer.

EDUCATION

Bachelor of Science: Computer Science

Jan 2022 - Present

Kennesaw State University, Kennesaw, GA

- Relevant coursework: Object-Oriented Programming, Database Systems, Cloud Software Development, Software Development Fundamentals

SKILLS

- **Languages:** Java, Python, SQL, C#
- **Development Tools:** Git/GitHub, Linux, MySQL, AWS S3, Unity
- **Engineering Foundations:** Object-Oriented Programming, Software Testing & Debugging, Relational Databases, Data Modeling
- **Delivery:** Agile/Scrum, Requirements Analysis, Technical Documentation, Team Collaboration

PROJECTS

ShopSync E-Commerce System

Mar 2026 - Present

Kennesaw State University

- Developed 3 core e-commerce workflows (product browsing, cart management, and checkout) for a 5-person team project by translating requirements into coordinated application features.
- Improved collaboration and deployment readiness across a 5-person team by managing code changes in Git/GitHub and organizing static site assets for hosting in AWS S3.

Online Sales Management System

Feb 2024 - Apr 2024

Kennesaw State University

- Delivered a database-driven sales management system for 1 client within a 2-month timeline by leading a 4-person team through requirements, implementation, and testing.
- Improved the consistency of client sales-data storage and retrieval by applying SQL/MySQL, relational modeling, and normalization to the database design.

WORK EXPERIENCE

Retail Sales Consultant

Dec 2022 - Feb 2023

AT&T, Marietta, GA

- Recommended devices and service options by identifying customer needs and explaining technical tradeoffs in accessible language.
- Adapted quickly to store systems and collaborated with teammates in a fast-paced environment, strengthening communication and problem-solving skills.
