

Raven Lightner

Oak Park, IL 60302 | rlightner6@gmail.com | (708) 261-6392

PROFESSIONAL SUMMARY

Cybersecurity student specializing in GRC with a background in compliance-driven, regulated environments including healthcare and logistics operations. Holds industry certifications in cloud security, network defense, and IT support. Brings hands-on experience enforcing regulatory standards, maintaining compliance documentation, and operating under strict safety and privacy frameworks — including HIPAA. Pursuing a career in risk analysis and audit.

EDUCATION

University of Maryland Global Campus

Bachelor of Science in Cybersecurity.

Expected Winter 2026

Rich Township High School

High School Diploma, STEM Campus.

Olympia Fields, IL

EXPERIENCE

Logistics Yard Coordinator

07/2021 – Present

Target

Chicago, IL

- Enforced safety compliance standards and applied operational controls to adhere to established regulatory guidelines.
- Updated and maintained databases to track shipment accuracy and inventory records, ensuring documentation integrity.
- Monitored inbound and outbound freight operations and documented cargo movements to maintain a complete audit trail.
- Coordinated between maintenance and management teams and mentored new team members to close knowledge gaps.

Mental Health Technician

04/2017 – 07/2021

Illinois Department of Human Services (IDHS)

Kankakee, IL

- Maintained detailed patient documentation in compliance with strict regulatory, privacy, and safety standards including HIPAA.
- Conducted routine safety checks and monitored patient behaviors, escalating risk observations to RNs to prevent incidents.
- Applied de-escalation and limit-setting protocols to manage high-risk situations in a regulated clinical environment.

PROJECTS

Cloud Infrastructure Security

Google Certificate Lab

- Configured IAM roles and managed firewall rules within a cloud environment to enforce access control policies.

Threat Detection and Response

IBM Certificate Lab

- Analyzed network traffic using Wireshark and reviewed system logs to identify potential security breaches.

Cryptography Implementation

uCertify Lab

- Applied encryption standards and managed digital certificates to protect data in transit.

Network Defense

TestOut Lab

- Designed and secured small-to-medium business networks, including VLAN configuration and IP addressing schemes.

CERTIFICATIONS

- Cybersecurity Analyst Professional Certificate, IBM
- Cloud Security Professional Certificate, Google
- IT Support Professional Certificate, Google
- Security Pro / Network Pro / Linux Pro / PC Pro, TestOut
- Cryptography and Network Security, uCertify

SKILLS

Compliance and Risk: HIPAA, Data Privacy, Regulatory Compliance, Risk Awareness, Incident Reporting, Audit Documentation

Security: Information Systems Security, Network Security, Threat Detection, IAM, Firewall Configuration

Technical Tools: Linux OS, Python, Wireshark, AWS, Cloud Concepts
