UBAID KHAN

Broken Arrow, OK | (918) 346-2077 | ubaidkhan08.com@gmail.com | linkedin | Github

SUMMARY

Computer Science senior (3.8 GPA, December 2026) with three CompTIA certifications in networking and security and two years of hands-on trust-and-safety and team-lead experience. Builds in C++, Java, C#, and SQL, with a focus on secure systems, data, and blockchain/fintech infrastructure. Seeking entry-level software, IT support, or technical solutions roles.

EDUCATION

Bachelor of Science in Computer Science **Expected December 2026**
Northeastern State University, Tahlequah, OK | GPA: 3.8/4.0

Relevant Coursework: Data Structures & Algorithms, Database Design & Normalization, Windows Programming (C#), Concurrent Programming (Java), Network Security

Associate of Science in Enterprise Development **December 2025**
Tulsa Community College, Tulsa, OK | GPA: 4.0/4.0

TECHNICAL SKILLS

Languages: C++, Java, C#, SQL

Tools & Frameworks: .NET Windows Forms, LINQ, Microsoft Office (Excel, Word, PowerPoint)

Networking & Security: Network configuration and troubleshooting, security fundamentals, phishing and threat identification, data protection

Concepts: Object-oriented programming, multithreading and deadlock prevention, relational database design, blockchain and asset tokenization

PROJECTS

RWA Compliance & Settlement Prototype | *C++, Ethereum Sepolia* **In Progress, Senior Capstone**

- Developing a prototype that routes tokenized real-world-asset transfers through rule-based compliance checks before transaction approval and settlement on the Sepolia testnet.
- Defined project scope and architecture with faculty review: compliance check, approval, and settlement as separate, testable stages.

Mini Blockchain | *C++* **2026**

- Built a multi-file C++ application that models a basic blockchain, linking blocks by hash and validating the integrity of the chain.

Dining Philosophers Concurrency Simulation | *Java then again in C++17* **Coursework**

- Implemented a multithreaded simulation of the Dining Philosophers problem and analyzed the conditions that cause deadlock and how to prevent it.

EXPERIENCE

Social Media Content Moderator **March 2023 – February 2024**
Alorica, Tulsa, OK

- Maintained 99% accuracy enforcing trust-and-safety policy while reviewing high volumes of user content.
- Identified and removed phishing attempts, scams, and other malicious content to reduce security risk and protect user data.
- Trained new team members on moderation policy and digital-security practices.

Customer Service Supervisor **December 2021 – March 2023**
Incredible Pizza Company, Tulsa, OK

- Led a customer service team through daily operations, assigning tasks and keeping shifts on schedule.
- Resolved customer issues and incidents on the spot, escalating only when needed.
- Trained staff on safety procedures and emergency response.

CERTIFICATIONS

CompTIA Network Security Certification May 2023
